617-480-0452

Denver, CO

Born into entrepreneurship, the study of this human phenomenon started early on for me following my father into meetings and later becoming advisor and partner to him. All of this drove me to pursue knowledge in the topic in which I attained both undergrad in Entrepreneurship & Accounting, and a Master in Technological Entrepreneurship. Currently this passion has driven me into becoming a web developer in the lights of gaining a deeper understanding of concurrent innovation. I consider myself a thrill seeker; a search that has lead me to live in several parts of the world carving a path for myself outside of the norm. This pursue for my own objectives and motivations has granted me a unique perspective which I treasure as one of my most valuable assets.

SKILLS
HTML, CSS, Node.js, JavaScript, jQuery, React.js
